

MUSTAFA PATHARIA

Software Engineer | Full Stack Engineer

patharia52@gmail.com | +91 87199 19988 | linkedin.com/in/mustafa-patharia | github.com/mustafa-patharia | mustafapatharia.vercel.app | Remote-first | Hybrid | On-site — Pune / Bangalore / Hyderabad

PROFESSIONAL SUMMARY

5+ years in Full-Stack Engineering, taking HR, payroll, and operations products with complex business rules from zero to production for UAE enterprise clients — owning distributed backend systems, state-heavy web dashboards, and mobile apps with Node.js/NestJS, Angular, React, Next.js, PostgreSQL, Redis, and AWS/GCP. I ship to international enterprise standards for compliance and uptime, and build AI agents and MCP servers that make teams faster.

WORK EXPERIENCE

Freelance Software Engineer (Aug 2026 – Present)

InnovateNex — Remote

React Native · NestJS · Next.js · Drizzle · AWS · Terraform

Projects:

- **SmartScan — RFID Warehouse Inventory SaaS (UAE Client Project):** Built a warehouse inventory platform end to end for logistics teams — a web platform paired with a handheld mobile app used on the floor. Featured workflows for receiving, picking, and bin transfers, alongside comprehensive inventory management. Included RFID scanning on Urovo devices, real-time stock tracking, and two-way sync with NetSuite.

Senior Software Engineer (July 2022 – July 2026)

KPI — Dubai, UAE

Node.js · Angular · Next.js · PostgreSQL · Redis · Docker · AWS/GCP · MCP

Key Achievements:

- **Zero-to-One Delivery:** Took KPI's HRMS SaaS from zero to production — built the platform from scratch in Node.js, Angular, and React, owning its architecture end to end. Now live with 10+ enterprise clients.
- **Full-Stack Architecture:** Designed a shared Node.js backend serving 800+ production APIs with zero cross-tenant data incidents across a unified multi-tenant architecture.
- **Frontend & UX Engineering:** Built responsive, role-based web interfaces with dynamic state management and reusable UI patterns across the platform.
- **Database & API Design:** Engineered isolated data strategies and complex relational schemas in PostgreSQL, delivering consistently low query latency on client-facing dashboards.
- **Agentic AI & Engineering Automation:** Built in-house AI agents and a custom ProofHub MCP Server, cutting manual development effort by ~40% on routine coding and PR review.
- **CI/CD & DevOps:** Automated CI/CD pipelines and infrastructure deployments with Docker and AWS, reducing deployment time by 80%.
- **Team Leadership:** Mentored junior developers and maintained consistent code quality across a growing codebase within a 6–8 person team.

Projects:

- **infithra — HRMS:** Architected and built the flagship HRMS from zero to production as founding engineer. Covers full employee lifecycle — configurable payroll, leave, and attendance modules built to UAE Labour Law compliance with bank-file payroll reconciliation and strict tenant-level data isolation.
- **RentalShare — Equipment & Fleet Rental SaaS:** End-to-end rental operations platform covering live bookings, dynamic pricing, automated contracts, vendor management, and real-time GPS tracking.

Software Developer (March 2021 – July 2022)

PACE Group — Sharjah, UAE

Vue.js · Laravel · PHP · MySQL · WebSockets · AWS Services · UI/UX Design

Key Achievements

- **Platform Engineering:** Built a multi-portal K-12 e-learning SaaS with role-separated experiences for students, teachers, and admins in Vue.js and Laravel.

- **Real-Time Engineering:** Built live interactive multi-user quiz sessions driven by configurable backend rules using WebSockets, PHP/Laravel, and MySQL.
- **Cloud Infrastructure:** Set up and managed cloud deployment and email delivery on AWS, achieving consistent uptime across the platform.
- **Mobile UI/UX Design:** Independently designed the full mobile app UI for phones and tablets in Figma and Illustrator.

Projects:

- **PreparEd — K-12 Learning App (Internal Startup):** Built a multi-portal SaaS with role-separated user experiences for students, teachers, and admins. Featured live quizzes, test generation, 3D chapter videos, achievements, and score rankings.

ADDITIONAL PROJECTS

TheBlueprintCode — Modular Full-Stack SaaS Template System (Personal, Open-Source)

NestJS · Fastify · PostgreSQL · Drizzle · Next.js · React · shadcn/ui · TypeScript

Multi-repo template system for shipping production SaaS. The Engine is a multi-tenant backend with schema-per-tenant PostgreSQL isolation, JSON-driven RBAC and auth policies, JWT/API-key/OAuth login, Stripe billing, and pluggable storage and mail adapters. The UI Frame is a Next.js 16 dashboard with 60+ components, auth flows, CRM/finance/analytics screens, data tables and theme presets. Each layer runs on its own or composes into one system, documented on a Fumadocs site. Published on GitHub under MIT.

Rift — Native macOS YouTube Music Client (Personal, Open-Source)

Swift · SwiftUI · yt-dlp

Native macOS client for YouTube Music — full catalog browsing, playlists, offline downloads, Dynamic Island-style live player in the notch, synced lyrics with on-device AI transliteration/translation, and fully local private listening stats. Published on GitHub under GPL-3.0.

EDUCATION

Bachelor of Engineering — Computer Science (Aug 2016 – Oct 2020)

University of Mumbai, Maharashtra, India | CGPA: 7.06/10

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, PHP, SQL

Backend: Node.js, NestJS, Express, Laravel

Frontend & Mobile: Angular, React, Next.js, Vue.js, React Native, Swift

Databases: PostgreSQL, Redis, MySQL, Drizzle, Sequelize

Messaging & Real-Time: Kafka, BullMQ, WebSockets, Pub/Sub

Cloud & Infrastructure: AWS, GCP, Docker, Kubernetes, Terraform, CI/CD, Observability

Architecture & Security: OAuth 2.0, JWT, SSO, RBAC, RESTful APIs, Distributed Systems

AI & Agentic: MCP Servers, AI Agents, RAG, Claude Skills

Design Tools: Figma, Illustrator, Swagger

ADDITIONAL

Nationality: Indian | Open to relocation across India | Immediately available
